03. Why Us

[Our Advantage](#)

► Company Profile

Mondo Technology Co., Ltd was founded in 2009 and is located in Bao'an district, Shenzhen, China, just 15 minutes away from Shenzhen airport. We are one of the leading manufacturers and exporters of FPC and Flex PCB SMT assembly production. We offer reliable component procurement, competitive pricing, and flexible customer service through strategic partnerships with Arrow and Avnet. With 14 years of independent exporting experience, we provide small MOQs starting from 1 square meter and sign confidentiality agreements with our partners.

► Our Team

Mondo Technology has a 6000 square meters factory area, with independent production department, we owned 2 manufacturer factories, one factory in Shenzhen China, and another factory in Jiangxi Province China, welcome to visit us if convenient.

20+ Senior Engineers

High-tech equipment and an experienced R&D team.

300+ Experienced Workers

Hundreds of experienced production assembling workers. Enterprising sales team, as well as professional service.

► Corporate Culture

- **Company Vision:** Faith is the alliance that inspires the future.
- **Corporate Spirit:** Pragmatism, professionalism, collaboration, and dedication.
- **Company Mission:** To help customers and company succeed, and achieve self-fulfillment.

We firmly believe that faith and unity are essential to creating a brighter future. Our vision is encapsulated in the phrase "Faith is the alliance that inspires the future". By working together with a shared sense of purpose, we can achieve great things and positively impact the world around us.

Our corporate spirit is grounded in the values of pragmatism, professionalism, collaboration, and dedication. We strive to embody these values in everything we do, both within our organization and in our dealings with customers and partners. By living and breathing these values, we aim to cultivate a culture that promotes innovation, excellence, and growth.

Our mission is to help both our customers and our company succeed, while also enabling our employees to achieve personal and professional fulfillment. We are committed to providing top-quality products and services that meet our customers' needs, and we are constantly striving to exceed their expectations. We believe that by supporting and empowering our employees to achieve their own goals, we can create a company culture that fosters creativity, innovation, and success.

02.OUR SERVICES

► Business Coverage

We primarily provide sample-making, mass production, and assembly services for flexible circuit boards, as well as additional services including layout optimization, FPC cloning, processing with supplied materials, and contract manufacturing.

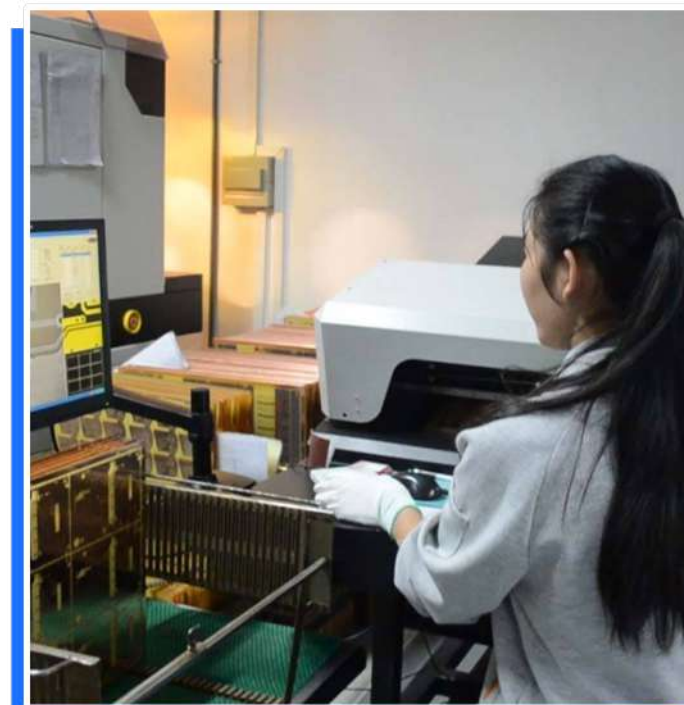

We have the capability to manufacture various types of FPCs (Flexible Printed Circuit Boards) with different specifications, including thicknesses ranging from 0.07mm to 7mm, 1-30 layers, and copper thicknesses from 0.25oz to 4oz. If you have specific design requirements, we can customize our products to meet your needs.

► FPC SMT

SMT (Surface Mount Technology) is a next-generation electronic assembly process that incorporates traditional electronic components into smaller, high-density components. This technology enables high reliability, miniaturization, low cost, and automation of electronic product assembly. SMT assembly directly welds components to the PCB, eliminating the need for leads to run through the board.

In addition to specializing in flex PCB manufacturing, we also have a competitive advantage in flex PCB assembly. Our expertise in this area has earned us a reputation as one of the top 3 flex PCB assembly factories in China.

► Process Capability

Process	Capability
Layers	1 - 30
Main Material	PI; Polyester; FR4.
Surface Finish	Immersion Gold/Silver/Tin; Plate Gold/OSP/ENIG.
Special Process	Blind Buried Hole HDI
Solder Mask Color	Green, Yellow, Black, White, Red, Blue.
Min Blind Hole Diameter	0.03 mm
Min Through Hole Diameter	0.1 mm
Min Trace Width/Spacing	0.035/0.035
Routing Tolerance	± 0.075
Hole Diameter Tolerance	PTH: ±0.4; HPTH: ±0.025.
Big Size	500 * 700 mm
Product Thickness	0.07 - 7 mm
Copper Thickness	0.25 - 4 oz
Hole Copper Thickness	15 - 100 um

► Factory Tour

03.WHY US

Mondo Technology Co., Ltd

► Our Advantage

Channels

We have established strategic partnerships with Arrow and Avnet, two leading distributors of electronic components, to ensure reliable and high-quality sourcing channels for our components. Our strict supplier audit system guarantees that all components meet our rigorous quality standards and are delivered on time, resulting in the exceptional quality and reliability of our products.

Team

Our professional team is fluent in English and is dedicated to providing our customers with comprehensive and flexible customer service. We strive to ensure that our customers receive the highest-quality products and services, and we are committed to meeting their unique needs and requirements.

Experience

With 15 years of independent exporting experience, we have gained extensive knowledge and expertise in the exporting process. We are well-versed in the various regulations and requirements of different countries, and we can provide our customers with comprehensive knowledge and support to ensure a smooth and successful exporting experience.

NDA

We value the trust and confidentiality of our partners, and to ensure the reliability and longevity of our collaboration, we always sign NDA agreements with them to protect their technical confidentiality. This way, they can be confident that their intellectual property and confidential information are secure with us.

MOQ & Price

Our MOQ is as low as 1 square, and we offer full-scale support to our partners, from sample-making to mass production. We are committed to ensuring that our partners can bring their products to market quickly and efficiently. Furthermore, we offer competitive pricing to help them capture market share while ensuring maximum quality and service experience for their products.
